

# Clonality in Cell Therapy Workflows

## FROM SOLENTIM

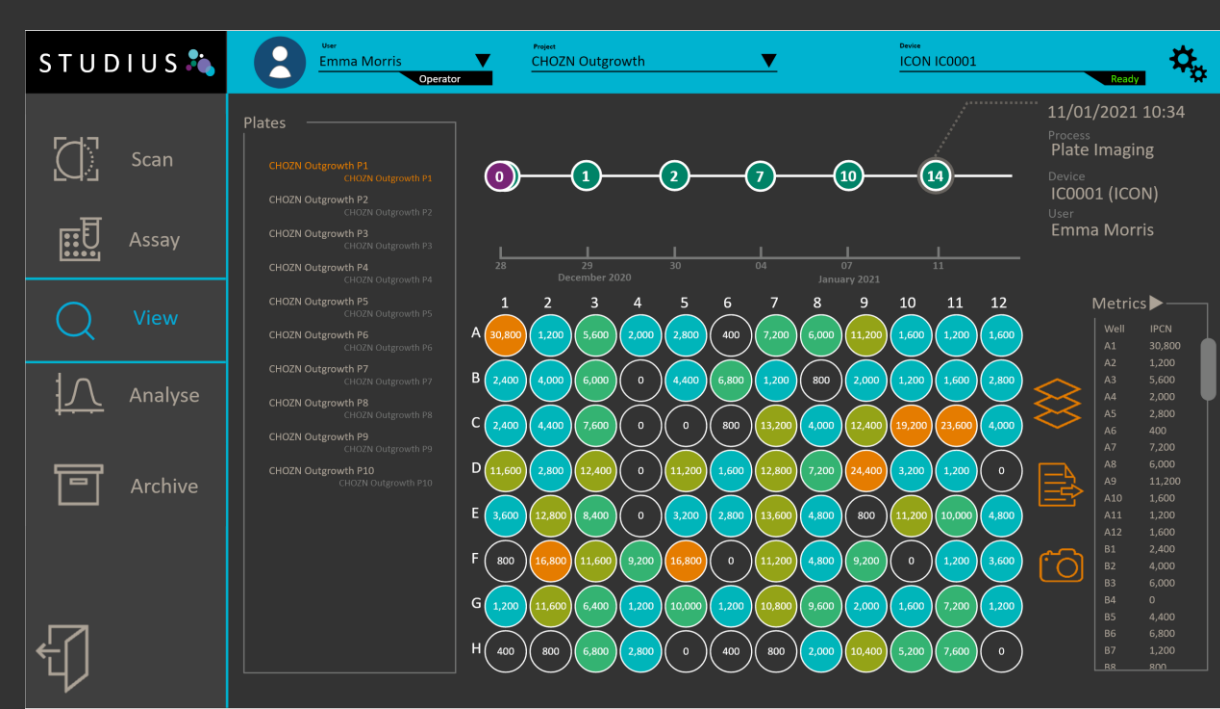

**VIPS™**  
High efficiency single cell seeding with droplet image and Day 0 whole well image.

**Cell Metric®**  
High throughput daily whole well imaging for assurance and growth rates.

**ICON™**  
For stratifying IgG producing clones based on normalised titer and specific productivity.

**STUDIUS™**  
Data management platform for cell line development.

**HISTORYTREE™**  
Tracks each cell's story through cell line development.
